

Brand Name Long-List

The Top 500 - re-ranked (calibrated, 3-judge)

Every name generated across three naming exercises (the David Placek / Lexicon method) was re-scored against fixed calibration anchors by a 3-judge panel - a Placek purist, a skeptical 35-55 buyer, and a linguist. This corrected a bias in the first pass that over-rated pretty-but-empty coinages and buried substantive names (e.g. Goldseam moved from #197 to #1). Score reflects quality, not availability. The 'Was' column = rank in the first pass ('new' = it wasn't in that top 500).

Clearance key

- Available** web-verified, no obvious collision - safest to pursue
- Unchecked** not yet checked - most names; needs a trademark/domain check
- Taken** verified existing-brand collision - avoid

Lanes (positioning open; favored: B, C, E)

B = Pro-aging / age-positive C = Science / longevity-led E = Barrier-health / resilience A = Results (minus the fear) D = Clean / transparency

Top 40 overall

highest-scoring across all lanes (calibrated)
